Smartivity® Pinball

Discover arcade-style fun with Smartivity! With this kit, your child will build a Pinball Machine and control the ball using the snappy flippers. Make sure that the ball doesn't get consumed by the 'Gravity Field'! Hit the 'Poppers' to make them fly and try to get the highest score by freeing the balls in Vaults A and B. The kit comes with easy-to-follow instructions, STEM concept explanations, and experiments that your child can do independently.

Mechanical Hand

Have you ever wanted a robotic hand of your own? In this kit, your child will build a Mechanical Hand. Your child will then wear it and control its fingers just like the fingers in your hands. For endless play, we have included blocks of different shapes, along with challenges. Stack the blocks by picking up each block one by one. Simple step-by-step instructions, STEM concept explanations, and experiments are included for independent play.

Smartivity® SOLAR SYSTEM

Introduce your child to the wonders of astronomy. With this kit, your child will build a functioning solar system model. They will turn a crank to watch the gear system move the 8 planets around the Sun. The kit comes with 8 informative fact cards about each planet, encouraging your child to explore and learn while using the cards and a spinner to play a fun game. Complete with easy-to-follow instructions and explanations of STEM concepts, this model promises to become a beloved addition to your home or classroom!

Missile Truck

Transform playtime with this exciting kit that empowers your child to build an air-powered Missile Truck. They will load 5 soft missiles onto the launcher and unleash them one by one using the air pump. With a 360-degree rotating launcher, they can fire in any direction. The air pump conveniently mounts on the truck, enabling it to roll freely on 6 wheels. Complete with easy-to-follow instructions, and explanations of STEM concepts, this kit inspires independent exploration and creativity.
